

## **Cynergy3 provide High Voltage Reed Relays to DIAN Racing**

DIAN Racing is a passionate Formula Student Electric team from Tongji University, Shanghai, China. The team designs and builds an electric formula-student-style race car every year. Established in March 2013, the team now consists of over 100 DIAN Racer members. The team has an international outlook, and aims at innovative solutions. It is pursuing both high speed and efficiency while at the same time having deep concern for the environment. The team members are enthusiastic and solidary, which gives the team a great foundation to build a high-level race car team. The team members aim to design and manufacture an awesome race car meanwhile to improve the efficiency of project management so that to participate in FSE competitions and contribute to the promotion of clean energy.
