

CTC-024 REACH Compliance

Overview

REACH stands for Registration, Evaluation, Authorization, and Restriction of Chemicals. It is a regulation of the European Union, adopted to improve the protection of human health and the environment from the risks that can be posed by chemicals, while enhancing the competitiveness of the EU chemicals industry. In principle, REACH applies to all chemical substances; not only those used in industrial processes but also in our day-to-day lives.

REACH created the European Chemicals Agency (ECHA) which has an essential coordination role in the overall regulation process. Located in Helsinki, Finland the ECHA manages the registration, evaluation, authorization and restriction processes for chemical substances to ensure consistency across the countries in which REACH applies.

InterFET Corporation does not currently manufacture or import any chemical substances into the EU on their own or in quantities of 1 ton or more per year. In addition, imported InterFET materials do not contain chemical substances intended to be released during the normal and reasonably foreseeable conditions of the product's use as defined by the REACH regulation.

Unpackaged Part Compliance

An InterFET unpackaged part is defined as a raw wafer, or individual wafer packed die in a COT or CFT configuration. All InterFET unpackaged end products meet the requirements of the latest regulation (EC) No 1907/2006 of the European Parliament and do not exceed the specified limitation for Substances of Very High Concern (SVHC) as described in Annex XVII of the REACH specification dated January 15, 2019. InterFET Corporation is awaiting responses from our suppliers regarding the new SVHC materials added on July 16, 2019. InterFET is confident from the replies received to date, that these new additions will not have any impact to our existing raw wafer and wafer packed die.

Packaged Part Compliance

An InterFET packaged part includes all metal case and plastic encapsulated part offerings. Typical InterFET metal case parts include TO-18, TO-71, and TO-78 parts. Typical InterFET plastic encapsulated parts include TO-92, SOT23, SC70-5 and SOIC8 parts. All InterFET packaged end products meet the requirements of the latest regulation (EC) No 1907/2006 of the European Parliament and do not exceed the specified limitation as described in Annex XVII and summarized in the accompanying SVHC Table I. InterFET Corporation is awaiting responses from our suppliers regarding the new SVHC materials added on July 16, 2019. InterFET is confident from the replies received to date, that these new additions will not have any impact to our existing raw wafer and wafer packed die. These materials are identified in Table I below.

Disclaimer: It is the Buyers responsibility for designing, validating and testing the end application under all field use cases and extreme use conditions. Guaranteeing the application meets required standards, regulatory compliance, and all safety and security requirements is the responsibility of the Buyer. These resources are subject to change without notice.

1. ND: Not Detected. Material not used or not detected to the Measured Device Limits (MDL) of the test equipment. Trace quantities of listed material may be present due to process requirements but are below the reporting threshold.

2. UMBL: Used Material Below Limit. This material is used in the manufacturing of the specified product but is below the required limit of 0.1% (1000ppm).
